March 25, 2010

Holiday Inn
Mankato, MN 56001

April 7, 2010

Mn/DOT District 1A
Duluth, MN 55811

April 14, 2010

Alexandria Technical College
Alexandria, MN 56308

April 21, 2010

Mn/DOT District 6
Rochester, MN 55901

Minnesota Statewide Truck-Weight Compliance Training

Road damage from overweight vehicles is a growing concern of state, county, city, and township transportation authorities. This training promotes voluntary compliance to significantly reduce the damage to public roads and highways—and the resulting repairs and expense—caused by overweight vehicles.

Who Should Attend

Trucking entities that want to load to the maximum legal weight possible. Scale operators, farm truck owners and operators, aggregate haulers, truck manufacturers who configure truck axles and tires, township and county authorities who influence truck route weights, any company representative who influences the purchase or alteration of new trucks, out-of-state companies that need to understand and comply with Minnesota's legal weight limits, and truck driving students.

Registration and Fees

This workshop includes coffee breaks and program materials. Registrants are on their own for lunch. Mail or fax the registration form or register online no later than one week prior to the workshop. Preregistration allows us to contact you if the course must be postponed due to weather or other factors. Disability accommodations are available upon request. Registration of more than three members from the same company requires instructor approval.

Informational Contact

For questions regarding course content, please contact course instructor Greg Hayes at 218-684-1764 or GAHayes@gmail.com.

Professional Development Hours (PDHs)

To the best of our knowledge, this course/activity meets the continuing education requirements for 6.0 PDHs as outlined in Minnesota Statute 326.107. More information concerning continuing education for professionals is online at www.aelslagid.state.mn.us.

Roads Scholar Program

This workshop (1.0 credit) is an option in fulfilling the elective portion of the Roads Scholar Program. For Roads Scholar Program information and enrollment forms, contact Mindy Carlson with Minnesota LTAP at 612-625-1813 or online at www.mnltap.umn.edu/roadsscholar.

Topics Covered

- An update of road weight limits and differences between the state and local systems
- Laws governing gross weights, axle weights, tire weights, road-restriction weights, and seasonally increased (winter and harvest) weights
- Road damage issues: how overweight trucks cost us all
- Overweight truck issues go beyond just gross and axle weights
- Classroom exercises to help you identify concerns in your own trucks
- What's different between axle spacing? Do I have the right tires for the weight?
- Issues to consider when purchasing a new truck, or altering a current truck
- Professional, easy-to-understand “take home” materials to assist you with your own configurations and options

This training has been updated to reflect 2009 truck-weight legislative changes including the new raw- or unprocessed-agricultural-permit weight increase.

Please Note: This is not a “permitting” class for those who haul over-dimensional or overweight equipment that requires an oversize permit from either the state or county agencies. The class does cover the permit requirement for harvest and timber commodities and the 10 percent winter-load-increase (WLI) permit for trucks operating on Interstate highways.

Course Instructors

This program will be presented by Alexandria Technical College.

Greg A. Hayes, who developed and coordinates the course, is a retired Minnesota State Patrol lieutenant. During the last 16 years of his career, Greg supervised the commercial vehicle enforcement in northwestern Minnesota.

Keith Williamson, co- instructor, is also a retired Minnesota State Patrol trooper, who, in addition to working in the commercial vehicle district, is a commercial vehicle mandatory inspection recertification instructor.

The University of Minnesota is an equal opportunity educator and employer. Disability accommodations are available upon request. Alternative formats of this publication are available upon request. Printed on recycled paper with 30% postconsumer waste.
