Aerial lifts include the following types of vehicle-mounted aerial devices used to elevate personnel to job sites above ground:
- Extensible boom platforms
- Aerial ladders
- Articulating boom platforms
- Vertical towers

The following tips will help you minimize potential accidents:
- Always stand firmly on the floor of the basket.
- Do not sit or climb on the edge of the basket or use planks, ladders, or other devices for a work position.
- Wear a body belt and a lanyard attached to the boom or basket.
- Install wheel chocks before using an aerial lift on an incline, if they can be installed safely.
Additional Information for Presenters
Review the information provided on the reverse side of this safety tip sheet. Please refrain from reading the information verbatim—paraphrase it instead.
